

Agile Sprints – Epic, Story, and Story Points

Definitions

- **Sprint:** A fixed time period in which the team completes a set of tasks.
- **Epic:** A large task broken down into smaller **Stories** that span multiple sprints.
- **Story:** A smaller, actionable task that is part of an Epic.
- **Story Point:** A unit to estimate effort or complexity (e.g., using the Fibonacci series: 1, 2, 3, 5).

Story Point Scale

Story Point	Effort Level
1	Very Easy task
2	Normal task
3	Moderate task
5	Difficult task

Sprint 1

◆ Epic 1: Data Collection

- USN1: Gathering butterfly images – **2 SP**
- USN2: Loading image dataset – **1 SP**

◆ Epic 2: Data Preparation

- USN3: Handling missing or corrupted images – **3 SP**

- USN4: Creating class labels & directories – **3 SP**
- USN5: Handling inconsistencies in file formats – **3 SP**

✓ **Total Story Points for Sprint 1: $2 + 1 + 3 + 3 + 3 = 12$ SP**

Sprint 2

♦ **Epic 3: Data Visualization**

- USN6: Creating bar chart of class distribution – **2 SP**
- USN7: Creating pie chart for data balance – **2 SP**
- USN8: Plotting line chart of training metrics – **2 SP**
- USN9: Mapping butterfly image locations – **4 SP**

♦ **Epic 4: Dashboard Development**

- USN10: Building Streamlit dashboard – **5 SP**

♦ **Epic 5: Model Story/Presentation**

- USN11: Writing model insights and story – **5 SP**

✓ **Total Story Points for Sprint 2: $2 + 2 + 2 + 4 + 5 + 5 = 20$ SP**

Sprint Summary

Sprint	Total Story Points
---------------	---------------------------

Sprint 1	12 SP
----------	-------

Sprint 2	20 SP
----------	-------

Total 32 SP

Velocity Calculation

Velocity = $\frac{\text{Total Story Points Completed}}{\text{Number of Sprints}}$ = $\frac{32}{2}$ = 16
Velocity = $\frac{\text{Total Story Points Completed}}{\text{Number of Sprints}}$ = $\frac{32}{2}$ = 16

- ◆  **Your team's velocity is 16 Story Points per Sprint.**
